

Wireless IT Signal Booster

Specifications

Enclosure	IP20 Stainless steel enclosure 202mm(H) x 90mm(W) x 60mm(D) – Height including aerial and gland
Mounting	Wall mountable
Display	Indicative coloured LED lights
Power Supply	Supplied 13amp mains plug
Battery backup	1 x AA 1.2V battery which will send a warning message in the event of power failure
Operating Conditions	Storage/transit: -20°C to +40°C Operation: 0°C to +40°C
Logging	<p>Signal repeaters receive data every 5 minutes and send these on to the RIOT-S unit over the radio network every 1 minute.</p> <p>The signal repeaters have an internal memory that can hold data for up to 2 days if radio network connection to the RIOT-S cannot be achieved (based on an 8 point system)</p> <p>Several signal repeaters can be installed on a site. Routes can be assigned dictating which repeaters should communicate, allowing an IT to send its data via many signal repeaters in order to reach the RIOT-S unit</p>
