

## Reports

### WebReact

#### **Averages**

Produces a report all or just the first input of all rooms over a period. The report optionally shows the average temperature as well as the minimum temperature, maximum temperature, latest value and the high and low alarm limit.

#### **System Reports**

Produces reports of one or many rooms. The reports can optionally show graphs, alarms and comments over a time range.

#### **Calibration Certificates**

Show the results of a system's point calibration.

#### **Compare Trends**

Allows the temperature trends of two rooms to be compared, either on the same graph or two separate graphs side by side.

#### **IQ**

Shows a table of all of the alarm settings of a system.

#### **OQ**

Produces a report of all the alarm events of the entire system over a time range.

#### **PQ**

Produces a report of all the alarm events of a chosen room over a time range.

#### **Paperwork**

Produces filled-in customer paperwork forms that are stored on the system.

Two style of forms have been produced so far 'Equipment and procedures intervention record' and a 'Permit to work'.

#### **Temperature Maps**

Produces reports of the results of fridge temperature mapping.
